

THE NORWAY ADVERTISER

Entered at the Norway Post Office as Second Class Matter.

Subscription rates \$2.00 in advance. Single copies 5 cents each at local newsdealers. Birth, marriage, and death notices free. All other notices and advertisements printed in this office receive one reading notice free. As a general thing, we can supply a limited number of copies of any issue within the next two days, 6 to 10 cents each. Time spent in looking up special articles will be charged for by the hour. When ordering the address of your paper changed, please give the OLD as well as NEW.

COMES UNDER PAID MATTER
A charge is made for publishing Cards of Thanks, Resolutions of Respect, Obituaries and for obituaries which we are not allowed to edit. The charge for Resolutions of Respect is \$1.50 and for a Card of Thanks, \$1.00.

A charge is made for publishing list of funeral flowers and for lists of wedding presents. The price is 50c for the first inch and 25c per inch thereafter.

Intelligence Column

Twenty-five words or less, one week, 25 cents; second week, 15 cents; each additional week, 10 cents. For more than 25 words add 1 cent for each word each time.

The Children's Corner

Basket to Make

Would you like to make a new kind of basket?

Take the bottom of some small, round cardboard box, one which has been used for face powder or eye cream, or even a large paper nut cup. Punch two small holes, one at each side of the box and into each end of a six-inch piece

of string. This is the handle of the basket. Cut a narrow strip of crepe paper or a strip of hard card in the same color as the box. Cut a piece of small wire around each of these circles. Then cut the pieces according to the pattern,

and paste them on the wired stem. Now wind narrow strips of green crepe paper about the stems of the ends and your candy flowers are complete. The number of flowers needed depends upon the size of your basket.

Line the sides of your basket inside with a lace doily, taking care that the lace part appears about the top edge of the box. Then fill the bottom of the basket with sawdust or sand, and stick the stems of the candy flowers into this. Cover the sawdust with scraps of green paper or a piece of wax paper. Now the flowers do really look as if they were growing in the basket. And they will keep fresh for a long time.

Next cut your outside frill, as shown in the illustration, and paste around the outside of the basket. If you wish you can add a small bow of satin ribbon to the handle. This basket will prove very attractive in shades of yellow, light blue, and pink are used for the flowers, green for leaves and stems, and lavender for outside and handle.

A Picture for You to Color

CHILDREN'S COLUMN

BLOODTHIRST THE WEASEL

Bloodthirst lived near a small well. There were squirrels all around him. Bloodthirst was a weasel and he was very small. He was as plump as a nut and he was very mischievous. He was a weasel to be. He also caught mice and small animals that he could get his hands on.

One day he was running around the woods and he saw a red squirrel. He ran as fast as he could and he started to chase the squirrel. He had the red squirrel in his mouth in a twinkling.

It happened that a few days before, the farmer's boy had seen Bloodthirst in the same hole and had tried to catch him. The squirrel was not so easily caught.

Bloodthirst started in the hole he had dug. He was going down another hole when he saw the squirrel. He made one jump and landed on the squirrel's back.

Bloodthirst only caught him by his tail. The squirrel was so startled that he jumped up and ran. Bloodthirst was so fast that he caught him by the tail.

Bloodthirst was so fast that he caught him by the tail. The squirrel was so startled that he jumped up and ran. Bloodthirst was so fast that he caught him by the tail.

Bloodthirst was so fast that he caught him by the tail. The squirrel was so startled that he jumped up and ran. Bloodthirst was so fast that he caught him by the tail.

Bloodthirst was so fast that he caught him by the tail. The squirrel was so startled that he jumped up and ran. Bloodthirst was so fast that he caught him by the tail.

Bloodthirst was so fast that he caught him by the tail. The squirrel was so startled that he jumped up and ran. Bloodthirst was so fast that he caught him by the tail.

Bloodthirst was so fast that he caught him by the tail. The squirrel was so startled that he jumped up and ran. Bloodthirst was so fast that he caught him by the tail.

Heard and Seen at Advertiser Office

"Glad to see they pulled the bank money together. Now let the town hang onto the institution." Don C. Seitz.

The Advertiser will be published Friday of next week instead of on Thursday as usual on account of the Fourth of July holiday.

What is the best method to remove moss from the lawn? Some say use a hand line, others say it is too slow. What will do it?

In another column you will find a notice to the Tax Collector and Tax Payers of Waterford, extending the time limit on discounting taxes to July 15th, inclusive. See notice.

Stephen B. Cummings had a Cuban chameleon safely boxed that he was showing to the village natives this week. Catching flies for the animal was too strenuous and someone was found who offered willing to do the work for his keep.

Crawford Himmus of Pelham, N. Y., called Monday morning while waiting for a passage to Birch Rock Camps, East Waterford, where he is a counselor for the season. He graduated from a high school last week and left New York Sunday. This will be his second year at the camp.

G. E. Sonia, of Bath, a printer at Dartmouth College, inquired about a job Monday afternoon. He told about his employment in the college print shop the past seven years and having the place "fold up" for the summer. He said he worked a few weeks for Dan Forbes on the Oxford County Citizen, Bethel, about ten years ago and inquired for some of the people he met there. Knocking around from one printer to another, he has a hunch that a job may be landed even for a short jam.

The Grand Trunk Ry. is again offering a very low excursion rate to Montreal and Quebec account of July 4th. Tickets are good going on regular trains June 30th, 1, 2 and 3, return limit July 5th. The going and returning dates have been so arranged that one may take in this very attractive excursion and return in time to help celebrate the 4th of July. Better phone nearest Grand Trunk ticket office for train service, or phone 4-671, Portland.

Sam Fawor was recently traveling from Orono to Augusta and was picked up on the road by C. M. Robbins of Old Town. On learning where Sam was from he said, "Oh, yes, I know E. W. Sanborn of Norway, also Arthur E. Forbes of South Paris, and a few others up that way." Mr. Robbins presented Sam with a few pencils for both offices, on which he had written "E. W. Sanborn" and "A. E. Forbes" respectively. Since 1883, C. M. Robbins Advertising Company, Old Town Maine, Calendars, blotters, fans, pencils, mirrors, needle books, etc., Thanks!

A few "Whys" have been submitted for our answer but we pass them along trusting somebody may find a way out of the trouble.

Why are 50 per cent of the boys who pass along the street possessed to jump up and tear off a leaf from an overhanging branch of a tree, leaving a ragged leaf or branch?

Why are children possessed to jump every fence that is put up for their protection and use the fence for hurdles?

Why do people traveling late at night delight in making all the noise they can for fear somebody might like to sleep occasionally?

Why do the gravel trucks that start out very early in the morning make more noise between 5:30 and 6 o'clock than they do any other time in the day? They simply roar down the street with cut-outs open.

Likewise the express trucks that make their trips during the night and unload from two to five o'clock in the morning. Why don't people who have caterpillar nests in their trees have them removed by the people he met there. Knocking around from one printer to another, he has a hunch that a job may be landed even for a short jam.

Why not suggest to the Reforestation Camp workers that this would be a good job for them to tackle.

But anyway clear out the caterpillar nests.

THE MAINE HILL BILLY

Hello Everybody: This is really nature in the raw over here on the Five Kezars at North Waterford. Our camp is on the point of a long peninsula on Jewett Pond. We have a nice auto road from the main road direct to our garage, which is only eight feet from our camp, named Matanagon, the Indian name which when translated means Ma's pretty point. This certainly is a pretty point, haven't you quite figured out where Ma comes in, unless it means mother nature.

A few nights ago as I was retiring, another of our famous lightning storms

came over. It certainly was a wonderful sight as the night was very dark and when the intervals of lightning came and brought to view this body of water and surrounding mountains it was a gorgeous sight. I got my camera out and tried to take pictures. If I'm lucky I will have some good pictures. I have just been interrupted by a group of children from North Waterford who came over for a swim. They are in the water now and very happy and appear to be enjoying life. This is an ideal place for a honeymoon. So if any young or old people are contemplating wedlock they can take a tip from me and find a place similar and throw away the key and they will find the greatest thing in life, that is happiness. We often ask ourselves just what is happiness anyway. I know happiness can be defined in words very easy to say but love plus contentment plus peace of mind equals happiness with one of these missing, life can be a very unhappy affair for any human being.

I speak out of this camp of mine and want over to West Stockholm to visit Mr. Wilhelm who has erected a wonderful cave man mansion about one mile up the side of the mountain. I was disappointed not to be able to meet this great man who certainly is a lover of nature and all wild life as well as a generous open importer.

Evening Camp. This camp resembles the houses of India I've read about, built solely of logs and up high so as to keep reptiles and dangerous wild life of the tropics out. This camp is built so strong by it will surely stand a century. As I walked up a natural flight of stone steps I came into the main living room and found myself in a real tropical cave.

Found myself in a real tropical cave. The furniture of the room are old and curious to describe. Several pieces had writing and signs on them resembling Arab or to make it more simple, Sumerian. I saw pictures of people, made of small stones certainly took my eye. There were two other rooms in the rear, the kitchen and dining room. I also spied a bathroom. I know it's worth a visit. I heard it rumored that the master was a very temperate gentleman. ("He must be one of the few in this gold digging country.") I know he is going to use it for a wood shed for I also found wood piled neatly in it. As I gazed upward in the living room I could see the balcony of the main floor. I then ran to the balcony and saw a very old man, the chamber floor where I found the chambers rather simple, yet luxuriously furnished, but rather semi private as the partitions were only an average body

high. The sanitary improvements were fine. I ended up on the front veranda, overlooking one of the most sight-seeing spots of nature that could be had of wild life, also the beautiful Lake Kezar was included in this great scene.

After looking things over carefully I thought what a great place it would make for a real twentieth century party. So So Long until a future period.

BOLSTER'S MILLS

During the months of July and August the village library will be open every Saturday afternoon from two until five o'clock.

Donald Wright and wife are stopping at their camp on the river for the summer. George Bliss from Worcester, Mass. has been visiting Mrs. Rena Bliss at Gertrude Weston's.

Fred Clark and wife and Richard Clark and wife are taking a trip to Northfield, Mass. and Ohio.

The Bolster's Mills 4-H Club met at the residence of Mrs. Lord, Wednesday evening, June 21st, for a most interesting session. The visitors were Mrs. Whitman and Wilmet Lord. The meeting was opened by singing State Club Song and the reading of usual reports.

After the meeting, refreshments of apples, popcorn, and grape juice were served. The Club also had a picnic, on June 23rd at Crystal Lake. The Club met at 10 o'clock at the beach. After dinner, they practiced songs for Children's Day program, also played ball. After the hour was up, we all went swimming. About 3 o'clock all started home, arriving home about 4 o'clock.

Gov. Bramm was the speaker, Wednesday at the 68th annual convention of the Maine Pharmaceutical Association, held at Rangleys at the Rangleys Lake House June 27-29th.

Maj. Clayton W. Pike of Overbrook, Pa., has been appointed chairman of the committee on arrangements for Fryeburg Academy Day, Aug. 17, when alumni and friends of Fryeburg Academy will gather to honor the memory of Rev. Wm. Fessenden, first pastor of the First Congregational Church and founder and first principal of Fryeburg Academy.

EAST HARTFORD

The Sewing Circle which met June 22, with Mrs. Abbie Berry was the banner circle of the year, there being 59 present and a large sum was netted for the circle. A number of children and grand children of the hostess from out of town were present.

Louis Vigne of New York City and Charles Howe and wife and her sister, Mrs. Ada Mahoy of Mechanic Falls were recent visitors of Mr. and Mrs. E. E. Piper.

William H. Turner of Auburn, a former resident has been stopping with Ellsworth Piper and calling on friends here. Mrs. Donovan Fickett of Bangor and Mrs. Roy Hall and little daughter of Dixfield have been spending a few days with their parents, Mr. and Mrs. F. W. Bryant.

Mr. and Mrs. Albert Hewitt of North Turner Bridge visited Mrs. Rosie Hewitt, Sunday and with her attended the special service at the church.

Mr. and Mrs. J. B. Irish and son, Howard, attended church here, Sunday. The special "Good Citizenship" service at the church Sunday was very well attended and the special music by a large choir including friends from Canton and Livermore was fine as well as the talk to the young folks by the pastor's wife, Mrs. Lorraine Libby and the sermon by the pastor, Rev. Harold Libby.

Mrs. Ralph Riley of Livermore Falls visited Sunday her father, J. C. Marston, who is ill.

SWEDEN

Roger Merrill and Ernest Bennett went to Portland Sunday, to see Mrs. Bennett. They found her gaining fast.

Mr. and Mrs. Forest Hutchins and Mr. and Mrs. Merrill attended the St. John church services at Lovell, Sunday. Josephine Renski has returned to her home in Denmark.

Mr. and Mrs. Eugene Woolbury were at their old home here, Sunday.

Mary Chandler of Lovell is staying nights at her new camp, "The Hills of Home" on Woolbury Hill.

Harold Vigne is working for Ray Kneeland in his mill.

Mr. and Mrs. Herbert Moulton and family were callers in town, Sunday.

Mr. and Mrs. Albert Hamlin called at W. D. Moulton's, Sunday.

Myra Cammell is home from her summer vacation.

The Great Hagenbeck-Wallace Circus, largest trained wild animal show in the world is coming to Lewiston, for performance Wednesday afternoon and night on Friday, July 7th.

NORWAY-A Good Place To Trade

Fireworks - - Fire Crackers But NO Firewater!

Another Glorious Fourth of July has rolled around and as usual we will have a complete line of NOISE MAKERS AND EVENING FIREWORKS.

ON SALE JULY 1, SATURDAY

TORPEDOES, SALUTES, SKY BOMBS, CAPS AND CAP PISTOLS, PINWHEELS, RED AND GREEN FIRE, ELECTRIC DRAGONS, CANES, HORNS, SKY ROCKETS, ROMAN CANDLES

ANYTHING AND EVERYTHING YOU NEED TO CELEBRATE THE FOURTH

OPEN ALL NIGHT BEFORE THE FOURTH

Ashton's Drug Store

Registered Druggist Always In Charge

Tel. 123, NORWAY, ME.

Norway

Uncle Zeke and Hulda Visit the Stores

Well, folks, the National Eagle is going to serenade next week up here on the farm. Daughter Nancy is bringing her husband and brood of three from Jersey City, son Ench, and his spouse and little Ench's motor car from Massachusetts and our youngest girl, Salome, Sal for short, will entertain her future husband what a time! But it's worth all the while. Making others happy is Hulda's philosophy of life, but sometimes she has a strange way of working out what's in her mind. To kinder get her own place, we dropped farm duties on Tuesday and called on our Norway friends.

Hulda's first thought was for a neat appearance before our guests, so we made purchases at the 36th Street Store, where the month end sale closes this week. Salome bought a fetching summer gown for her "coming out" and Hulda went for guest towels and swivel chairs. She stocked up on numerous articles for the low prices that perhaps will never be repeated on many things.

My turn came at the L. F. Pike Co., not only in anticipation of the holiday, but for our vacation after having. There was a large assortment of summer underwear, a variety of shirts appropriate for common occasions or a regular high hand shake function. I bought a Jantzen swim suit for Nancy's husband; naturally he wants one of the best, and a Panama hat for our own personal property.

The glorious Fourth was out next thought. Couldn't buy anything this early, its again regulations, but at Ashton's we had a line on crackers, fireworks, horns, flags and noise-makers to be sold Saturday. Lester and smiling Perley invited us to join the crowd there the night before. The Luncheonette and ice cream department will be in action all night, but what's the use? Hulda takes exception to late hours and holiday temptations. Here is a tip, try Ashton's ice cream sodas, only a dime.

McAllister's Store in Newberry Block is ready to unload an ox-cart load of firecrackers, fireworks, torpedoes and novelties. We selected our stuff, but must keep hands off until Saturday. Don said the place will be open all night on July 3 for patrons of eats and cooling ices. Eight flavors of ice cream will be served in any combination to suit individual taste.

HIRAM

Marjorie and Elwin Moulton having completed their four years work at U. of M. have returned to their home in Hiram. Miss Vivian Clemons, student of U. of M. is spending the summer with her parents, Mr. and Mrs. Seth Clemons. Bobby and Janet Libby are visiting their grandparents, Mr. and Mrs. Louis Lamont.

Miss Lord of Westbrook spent the week end with Mrs. Carolyn Ray.

Evelyn Rankin has gone to Naples for the summer.

The 4-H Club held a social at K. P. Hall, Wednesday night.

Freeman Howard and Norma Stunt, recent graduates of Fryeburg Academy are spending the summer at their respective homes.

The agent of the Children's Heart Work Society has been soliciting the town for funds.

Mr. and Mrs. Philip Wentworth and family of Providence, R. I. have returned to their summer home at Bear Cap. Miss Vivian Glines of Fryeburg is visiting her sister, Mrs. Rodney W. Ward. On Sunday, June 25, the Western Maine League Paris was delightfully entertained at Camp Blazing Trail, Denmark. Rev. Emmett Rankin, pastor of South Bridgton Congregational Church, held the morning service at Rev. H. H. Hoyt of Hiram had charge of the afternoon service. Music was furnished by Miss Parker, owner of the camp, and lunch was served at the lodge.

Mr. and Mrs. Winthrop Turner of North Abington, Mass. have been visiting at the home of Mr. and Mrs. G. H. Rankin.

FOR A GOOD OLD FASHIONED

Fourth

GO TO McALLISTER'S

Newberry Block—Norway

For Firecrackers, Fireworks, Flags, Horns, Torpedoes, etc.

Sale commences Saturday, July 1, open all night before. You can have 8 different kinds of Ice Cream, plenty of eats at our Luncheonette. Try our special sandwich.

THE MERCHANT DRY GOODS STORE

The Store of Values and Satisfaction

Friday and Saturday of this week will be the wind-up of our June End O' Month Sale.

And these two days will be store wide Sale Days when every purchase you make will be at a less price meaning a saving of 10 per cent or more, in some instances, you make a saving of one-fourth, one-third, and even one-half.

Summer Coats

All of our long Summer Coats except white are now marked one-third to one-half less than the regular fair price.

The low prices of this Friday and Saturday will be the same as last week, you make savings not only on the odd lots and discontinued numbers but on all regular new goods, making a Store Wide Sale.

See last week's ad for partial list of savings.

NORWAY VICINITY
Cosmic Rays

Compiled by Stephen B. Cummings

The behavior of Cosmic Radiations is described as "seeing through a glass darkly," but with a faith that they are something important, from which benefits or some future time may be attained.

The physicist has already described the atom as having for its nucleus, the proton and that each of the 92 elements, of the material of the Universe, their atoms contain from one to ninety two electrons which are revolving around the proton of each atom with a frequency of millions of times per second, varying respectively with each material, and changing their orbital position from one to another, in order to stabilize the position of each atom (to illustrate, the moon is the negative electron, the earth is the positive or proton).

A pure hydrogen gas atom contains one negative electron, of helium gas, two electrons, lithium 3, neon 10, sodium 11, copper 29, gold 78, mercury 80, radium 88, uranium 92 of these elements. The weight of the various atoms co-ordinate with the number of electrons of each element. If the element, mercury of 80 electrons could be changed to 79 electrons, gold would be the result and that would make the alchemist happy if it could be done.

The protons of atoms are positive charged and the electrons negative. The atom insists that the positive and negative charges be balanced unless disturbed. Any of the elements are just a collection of their atoms in their purity. Protons of atoms are 1845 times heavier than the negative.

X-rays and the gamma rays of radium have the power to displace or even separate negative electrons from positive electrons of the protons of the atom. The above is an introduction for comparison of electrons of atoms of the elements with emanation of Cosmic Ray radiations, and gamma rays of radium. Experiments have revealed the excessive power of penetration of cosmic radiation, as the rays penetrate through six feet or more of lead, and of forty feet of the lake water of mountain springs, the nearest to distilled water that it is possible to obtain. Their penetration is only reduced in deep mines, but rapidly in ascending to the stratosphere, as is proven by Picard and his associates, in their ten mile journey of recent ascent.

The cosmic rays are not dependent on longitude, though they do show a change with latitude, that is, they diminish about 7 per cent, as one goes from latitude 30 degrees to latitude 10 degrees at sea level. At higher levels this so-called "latitude effect" is greater, attaining a value of over thirty per cent at an altitude of 20,000 feet.

The most straightforward interpretation of this effect is that the cosmic rays are charged electrical particles which are prevented from reaching the earth near the equator by deflection action of the earth's magnetic field, analysis shows however that this point of view is not quite capable of accounting for the latitude effect and is moreover seriously in discord with general facts previously mentioned. On the other hand, everything with the possible exception of the latitude effect, is nicely explained, by the assumption that the cosmic rays are light rays, sometimes called quanta, or photons of very short wave length.

We consider that cosmic rays enter our atmosphere entirely in the form of photons. It must be kept in mind however that this is not quite settled and that the nature of the matter which emit such photons, is still shrouded in mystery. The cosmic rays are not affected by the position of the Sun, day or night, summer or winter and remains constant except for slight irregular fluctuations. They show no connection with the Milky-Way and hence do not originate in our galaxy.

The rays or photons of visible light which we receive from the stars (excepting the Sun) are over 100 million times as numerous as the cosmic ray photons, yet so energetic are the latter that in spite of their small number they carry almost as much energy as the light rays. Most of them are capable of transferring to an electron by collision as much as thirty million volts and some a hundred times as much.

Photograph of tracks left by cosmic rays on a photographic plate. They are shown penetrating a thin millimeter slab of lead without any change of path. Their straightness proves them to be of high energy, for the apparatus for the alpha particles field which would have bent perceptibly electrons of a billion volts.

The accompanying photograph is the result of cosmic radiation, the power of penetration of cosmic ray radiation, in its journey through six millimeters of lead over one fourth of an inch of lead. In a strong magnetic field of a billion volts the passage of an electron would be bent. The amount of curvature is a measure of the speed and energy of the ray and turns out to be remarkably small, showing the rays to be of enormous energy, sometimes several billion volts.

Very recently it is reported that a process of producing alpha particles by more than 100 million volt intensity, knocking off electrons from helium atoms then using the alpha particles to blast out neutrons from the light weight element, beryllium.

One million volts of X rays does not penetrate one inch of lead while the neutrons will penetrate more than four times this thickness, which next to cosmic rays is of the greatest penetrating power. With the bombardment with alpha particles, beryllium is changed to pure carbon.

Three decades ago, physicists studied and labored to get rid of these apparently weak electric currents for they were considered a nuisance, an interference, in the study of these rays from other angles. No practical electroscopes (electroscopes is to the physicist what the telescope is to the astronomer) can be screened from cosmic rays and consequently no instrument is entirely free from this electrical leak.

The observations show that on an average one and a half ions per second are produced in every cubic centimeter of air at sea level, this production is however not regular; it occurs only when a secondary electron from a cosmic ray happens to pass by. On an average only one such electron passes through a horizontal area of a square centimeter (four tenths of an inch square) at sea level, every 100 seconds. Thus for example, about a hundred pass through the body every second, and they are relentless, except in deep mines, there is no escape, they destroy everything in their path, but fortunately are so small that the damage done in a life time is quite negligible.

From the study of cosmic rays we hope to gain a knowledge of the nuclei of atoms, of connection between relativity and quantum mechanics, of processes in distant parts of the Universe, possibly a direct clue as to how complex atoms are formed. In describing elementary high speed particles of the kind we have been describing, relativity plays an important role. The effects involve entirely new laws rather than a slight modification of Newtonian mechanics.

The world of these high energies is quite different from the one of which our intuitions were formed. Our theories are still quite weak, even relativity is open to question and we must depend on further experiments to guide us forward.

NORTH PARIS-TUELL TOWN

Arthur Stevens and sons, Ernest and Herbert and Mildred Hazelton motored to Hartford, Sunday.

Mrs. Reta Rowe and son, Charlie of North Buckfield who have been visiting with Mrs. Mildred Allen and family, the past two weeks returned home, Saturday night.

Miss Nina Bradford and friends, Mrs. Ralph and daughters of Wolfram, Mass., were re-baptized at the Baptist home.

James Gibbs is building a camp for Nina Bradford.

Mrs. Marjorie Rowe and two children, Rodney and Albert, of North Buckfield, have been with Mrs. E. Elwell the past week. Barbara Rowe spent the week with her aunt, Mrs. L. E. Morgan and family.

Mrs. L. E. Morgan, Sylvia Morgan, Mrs. A. C. Allen, Mrs. Silver Rowe and Mrs. Mordant Rowe attended the sale at Norway, Thursday.

Several from this way attended the dance at West Sumner, Saturday evening. There was a large crowd.

The road crew repaired the roads in this vicinity, last week.

Miss Sylvia Morgan is visiting Mrs. M. L. Rowe and family at North Buckfield a few days.

Howard Wright was a visitor at Leon Bradford's, last week.

Misses Sylvia and Madge Morgan, Mrs. M. L. Rowe and three children and Mrs. B. F. Elwell spent the day, Friday, with Mrs. Stanley Sturtevant and family of the mountain district, South Paris.

SUMNER-LABRADOR POND

Aubrey Dyer of Rockland, Mass., formerly of Sumner, who underwent a surgical operation for gland trouble at the Deaconess Hospital in Brookline, Mass., a week ago, is resting as comfortably as could be expected and his condition favorable. His wife has been obliged to take her for a few days on account of high blood pressure undoubtedly caused by the high tension which she has been under for the past few weeks, not only caring for her husband but her daughter, Ethel Jacobs who recently underwent a serious operation and was with her for a time, after returning from the hospital.

Mr. and Mrs. H. B. Burnett, Somerville, Mass., are guests at Pleasant View Farms.

Mrs. Frances Pollard who was taken one day last week to a private hospital in Portland, where she underwent a serious surgical operation is as comfortable as could be expected. Her daughter, Jennie, who is a nurse, accompanied her. Evelyn Farrer went to Portland, Sunday, to visit her mother, Mrs. Pollard and sister, Jennie.

Mrs. W. V. Redding of Buckfield has announced the engagement of her daughter, Audrey L. Rowe to Charles Noppenberger of Baltimore, Md. The wedding is to take place in the very near future at Baltimore and the couple will take a short wedding trip to Atlantic City; upon their return they are to reside in an apartment in Baltimore, where Mr. Noppenberger has employment on the police force.

Friends of Miss Rowe gave her a miscellaneous shower at her home in Buckfield, on Wednesday evening, June 28, in honor of her approaching marriage.

Urban Rowe, Ivan and Audrey Rowe accompanied by a friend, Miss Evelyn Ridley were dinner guests Friday of last week of their uncle, Leland Andrews and family at Pleasant View Farms.

Mr. and Mrs. W. E. Doble and children were week end guests at Herbert Bisbee's while visiting his father, E. G. Doble and sister, Eva Doble.

Lawrence Andrews is working for Henry Hussy for a few days building road.

Leland Andrews and sons, Julian were dinner guests Saturday of their niece and cousin, Mrs. Violetta Martin of West Paris as they were in that section erecting road-side signs, and painting green bands on poles directing tourists to Pleasant View Farms.

Thomas Dyer the "Fuller Brush" agent was in this section and William Selinger's around with dry goods.

Friends of Wilma (Davenport) Richardson are glad to learn that she has recovered from her recent illness sufficiently to be able to return home from the hospital.

Dot Brown spent Saturday night with Thelma Edith Andrews, and attended the dance with the Andrews' family.

Edgar Barrett had a dedication dance in his new barn, Thursday evening with music by Dick Emory's orchestra of Lewiston.

WEST PARIS-TRAP CORNER

Clayton Pierce, who has been at the C. M. G. Hospital four weeks, has returned home and is gaining in health.

Mr. and Mrs. P. W. Treavor of Augusta spent the week end with their son, Earle and family.

Mr. and Mrs. Norman Gelatly and Miss Sylvia Mikkonen of Jamaica Plain, Mass. are with Mrs. Katri Mikkonen for the summer.

Mr. and Mrs. David Gilson and daughter were at G. L. Briggs' Sunday.

Frank Kimball called at Cyrus Hazelton's, Sunday.

EAST SUMNER-SUMMER HILL

Mr. and Mrs. M. C. Barrows and daughter Ethelyn of West Sumner called at Herbert Bisbee's, Monday.

Mr. and Mrs. Ed Doble and family of Arlington, Mass., were week end guests of Herbert Bisbee and family.

Mrs. Dora Farnum and son, Archie, of Rumford, were week end guests at A. F. Davenport's.

Mr. and Mrs. Alfred Morrill and family of North Wymouth, Mass., have arrived to spend the summer at their farm, Celia and Vivian Russell spent a few days with their cousins, Beatrice and Elmer Morrill.

Linwood Bonney of Stratford, Conn., arrived home Saturday to spend the summer vacation with his parents, Mr. and Mrs. John Bonney.

REDDING AND SHAGG POND

John Andrews has finished his work at West Paris and is working for George Redding.

Ernest, Audrey and Ivan Rowe and Evelyn Ridley of Buckfield were Sunday guests at Merton Rowe's.

George Redding has been doing some carpenter work for Cliff Allen at East Sumner.

Charles Hotham and family, who have been living in one of Will Redding's rents have moved to West Sumner.

Evelyn Ridley, Audrey Rowe, Urban and Ivan Rowe of Buckfield were dinner guests at Frank Moody's, Shagg Pond, Sunday.

Mark Wheeler and Dick Hayes of Wakefield, Mass., spent several days last week at the Wheeler camp at Shagg Pond, they went to Conn. Lakes, N. H. from here.

Mr. and Mrs. Harry Morton and Kathleen Richardson were at "Camp Killdeer" over the week end.

Keth Huntress of South Portland was a supper guest of Mr. and Mrs. Woleford Lapham, on Friday of last week.

Mr. Huntress and Mrs. Mae Smart of South Portland came to "Camp Mollock" Thursday of this week, to begin their duties there for the summer.

Mr. and Mrs. Alton C. Wheeler and daughter, Miriam, were called home from their camp here, Sunday morning, on account of an accident to Mrs. Wheeler's mother, Mrs. Hayes.

The Misses Iola and Hazel Lapham of Rumford spent the week end with their brother, Welford Lapham and family.

Roger Clapp and friends of Middleboro, Mass., are at Little Concord Pond for a few days.

There are five young ladies from different parts of New England, occupying the Trask camp, at Shagg Pond, this week.

Miss Alicia Bessey of Rumford Corner has been visiting her grandfather, Dermott Robbins and family, the past week.

Mr. and Mrs. Elliot Newell and son, Stanley, of Sumner, Mass., were at the Barrett camp over Sunday.

Miss Alice Bessey of Rumford Corner has been visiting her grandfather, Dermott Robbins and family, the past week.

Mr. and Mrs. Elliot Newell and son, Stanley, of Sumner, Mass., were at the Barrett camp over Sunday.

Miss Alice Bessey of Rumford Corner has been visiting her grandfather, Dermott Robbins and family, the past week.

Mr. and Mrs. Elliot Newell and son, Stanley, of Sumner, Mass., were at the Barrett camp over Sunday.

A NEW STATE BANK
FOR PORTLAND

and the communities formerly served by the

Casco Mercantile Trust Company

TO BE CALLED

CASCO BANK & TRUST COMPANY

This is not a re-organization plan nor has it any connection with any plans that have been presented in the past.

IT IS SPONSORED by a substantial group of depositors and the Board of Directors of the Casco Mercantile Trust Company.

IT IS DESIGNED TO PROVIDE:

1. Sound banking facilities for all communities formerly served by the Casco Mercantile Trust Company.
2. Banking and credit facilities for former depositors.
3. An organization to assist in freeing impounded deposits in the old bank.

PURPOSES OF THE NEW BANK

The Board of Directors of the Casco Mercantile Trust Company feel that there is an urgent need for the continuance of the banking facilities formerly supplied by that bank in Portland and other communities, but they realize that it is impractical to effect a sound and workable re-organization which can be approved by the Court as complying with the Statute.

They are confident that a NEW BANK, with its knowledge of the loans and investments of the old bank will render greater assistance in securing maximum recovery for depositors than any other agency.

The policies to be followed in its operation should, in the belief of the incorporators, be designed to continue the friendly banking relations formerly enjoyed by

Casco depositors and to render every possible assistance in obtaining the maximum recovery from impounded deposits.

It is proposed that when the new bank is firmly established, it will from time to time, with the approval of the Court, purchase assets and assume proportional deposit liabilities of the Casco in so far as is consistent with sound banking. How far this can be carried will depend on the extent of depositors' cooperation, both in stock subscriptions and in future deposits.

With these things in mind, the incorporators propose the formation of a new state bank in which the stockholders, directors, and depositors of the Casco, and the public, is invited to participate by subscribing toward the capitalization of the new institution.

CAPITALIZATION—The amount to be raised shall be not less than \$300,000, of which \$200,000 shall be capital and \$100,000 surplus. The par value of the shares shall be \$25.00 and they shall be sold for \$37.50, providing a surplus of \$12.50 for each share. In order that all depositors, both large and small, may participate, scrip certificates will be issued for fractional shares.

SUBSCRIPTIONS—In addition to the subscriptions from directors, stockholders, and depositors of the Casco, the public is invited to subscribe for stock in the new bank. It is hoped that each depositor will pledge at least 10 per cent of his deposit, such amount to be payable out of his initial dividend when the same is declared and payable.

BRANCH OFFICES—With the approval of the State Banking Department, it is proposed to maintain branch offices in the communities where the Casco operated, provided the depositors and public in those communities clearly indicate that they will adequately support such offices. The establishment and continuance of those offices must necessarily depend on the extent of such support.

PERSONNEL AND POLICIES—The stockholders of the new bank will elect its directors who shall formulate its policies and select the officers and personnel. The incorporators present activities are intended solely to assist in its organization. The list of incorporators shows how well this new bank plan has been received by those interested in the Casco Mercantile Trust Company. Pamphlet giving complete details is available to each depositor.

It is obviously impossible for the incorporators or general committee to see all depositors and your complete co-operation is necessary by communicating with headquarters. Add your endorsement by subscribing for stock NOW.

SUBSCRIPTION FOR STOCK

In consideration of similar subscriptions executed by other individuals, firms or corporations, I do hereby subscribe \$ toward the purchase of stock in a new State Bank, to be called "CASCO BANK & TRUST COMPANY." The price of the full shares is \$37.50 per share. This subscription is subject to the minimum amount of capital and surplus (\$300,000) being subscribed and the bank organized.

I agree to pay said subscription on demand, either
A—By paying in cash;
B—By an allotment of per cent of my deposit in the Casco Mercantile Trust Company payable out of the first dividend.

Signature

ORDER OF PAYMENT

To the Conservator—Casco Mercantile Trust Company,
and/or National Bank of Commerce:
Pay to the order of HENRY F. MERRILL and H. HERBERT STURGIS, Trustees, the sum of Dollars (\$) and deduct this amount from the dividend payment due me on my deposit in the Casco Mercantile Trust Company.
Witness
Signature
Address

HEADQUARTERS: Monument Sq. Office, Casco Mercantile Trust Company

BUCKFIELD-STREAKED MT.

Mr. and Mrs. Fred Maxim were at Waterville, Bumpus' last Sunday.

Miss Flora Whitman has returned home for her summer vacation.

There was a meeting of the Buckfield Busybodies 4-H Club at the home of Norman Lovejoy with all members present.

Mr. and Mrs. Linwood Corbett and three children of Paris were callers at Corbett's, Sunday.

Howard Corbett of South Paris was a guest visitor at Morton Clark's.

Mr. and Mrs. Montelle Turner and Stanley Turner were at L. I. Moore's, Sunday.

Muriel Washburn returned from the C. M. G. Hospital, last Saturday.

Mr. and Mrs. Abner Howard and three children were at South Paris, Sunday.

Mr. and Mrs. Clarence Thayer, Deering and Erdine Cash went to fishing, one day last week.

Tom caught a salmon weighing four pounds.

Joe, Harry, Alfred Leland and the Red are working in the field at South Casco.

Mrs. Stella McAllister and family last week much improved and the children are happy.

Marjorie Hamilton of Portland, who will soon open her own business, has a good stock of goods.

Summer guests are arriving at the camps here. A good stock of goods is being sold.

With full camp, the children are happy and it is a good time for them.

Although not having the usual amount of business, the small shops are doing well.

The hardest hit, although not being often summered, is in August.

Mr. and Mrs. Leland and family, in August, are at the camp.

Mr. and Mrs. Leland and family, in August, are at the camp.
